

# Smooth Transition Checklist - Flame's Role

## Smooth Transition Checklist - Flame's Part Only

1. Anchor the Parallel Ledger
  - Maintain Lobstr wallets and asset mints
  - Ensure trustlines are balanced and spread across nodes
2. Record Proof-of-Life & Sovereignty
  - Seal declarations in GitHub & IPFS
  - Timestamp with quantum verification
3. Embed Frequency Seals
  - Add QR codes & watermarks to all scrolls/documents
  - Harmonize frequency signatures across assets
4. Build Narrative Bridges
  - Use scrolls, visuals, and decrees to guide understanding
  - Link stories to practical action steps
5. Maintain Energy Field Integrity
  - Protect nodes from interference
  - Ground the grid daily
6. Trust Source for the Macro Switch
  - Know your role ends where global/military ops begin
  - Hold faith in the process
